CAREER OBJECTIVE

As a Full Stack Web Developer, I design and develop web applications using Java, React, CSS, HTML, and. I also create and integrate APIs to enhance the functionality and performance of the applications. I enjoy solving complex problems and delivering high-quality solutions.

EDUCATION

Regent Education And Research Foundation   Barrackpur
B. Tech Electrical Engineering   *2011 – 2015*
  - DGPA 8.05

PROJECTS

Portfolio | *HTML, CSS, Java Script*
  - It includes a dedicated page of education, experience, and contact
  - Visitors can easily download my resume, check LinkedIn profile and contact details

Shopping Cart Calculator | *React JS, Bootstrap*
  - Add /Remove Product, Set Quantity and calculate total amount

Random Password Generator | *HTML, CSS, Java Script*
  - Simple and User-friendly interface, Users can select password length and choose from various character types, including uppercase letters, lowercase letters, numbers, and special characters.

  - The application utilizes JavaScript to generate random passwords that meet security standards, ensuring they are difficult to guess.

Pin-code Locator | *React JS, CSS*
  - Users can input a pin code, and the application retrieves and displays location details, including the area, city, and state, Division, block etc.

Login Page(UI) | *React JS, CSS*
  - UI of Login Page with current time and date updating
